

# Salon Professional Academy

## Top-Notch Training

The future success of a salon and spa professional depends on training. This is why we created The Salon Professional Academy—training centers for tomorrow's most talented salon and spa professionals. Our standards are high, we hire only the best educators, we accept only the best students, we use only the best product and we produce only the best results.

Our affiliations with REDKEN 5th Avenue NYC and the Summit Salon Business College of KRS Consulting Group help maintain our high level of training and allow for exceptional job placement opportunities around the country.

The Salon Professional Academy's students learn cutting edge techniques from experienced educators while gaining essential business skills for a successful career. Today's students at The Academy are tomorrow's leading salon and spa professionals. The Academy is a state-of-the-art salon training center featuring quality salon and spa services. We are open to the public for these services, delivering value to our guests. Students perform all services under the supervision of licensed professional educators.

The Salon Professional Academy is focused on creating a dynamic learning environment for students while offering superior value to our guests. Our "student focused" approach blends business skills for salon success with a non-traditional, learner-focused training structure. Our objective is to produce highly trained, well prepared graduates for the top 20% salons. We are committed to excellence.

At The Academy we are salon and school owners growing the next generation of salon and school leaders, one student at a time.
